## Performance

The table compares the fund performance with the ARC Private Client Indices (PCI) benchmark, a measure of a peer group of similar investment managers using similar asset allocations. The comparator benchmark is an indicator of similar investment strategies and does not show future returns or investor expectations. ARC monthly data is estimated and may vary from actual performance. ARC data is then confirmed at the end of each quarter, which could change monthly returns.

**Past performance is not a guide to future performance**

## Monthly Market Commentary - November 2022

November was a positive month for global equities, rising 4.2% in Sterling terms, as slowing inflation pressures led central banks to confirm less severe monetary tightening, which buoyed investor sentiment. There were also signs of China reopening from the zero covid regime.

Regionally, UK equities rose 7.1% as the Chancellor looked to restore the UK's economic and fiscal credibility with the announcement of the government's Autumn Statement which included proposed tax increases and spending cuts. Once again energy was a major beneficiary of these market moves. In other regions, Emerging Markets reversed previous losses ending the month up 11%. Despite weak PMI figures indicating a slowdown in economic activity, policymakers' efforts to support the struggling domestic property sector and further easing in monetary policy strengthened returns. European equities also rebounded in November, climbing 7.8%. Preliminary inflation numbers for the month showed the first easing in over a year, creating some optimism that the ECB might slow down the tightening of monetary policy if this pattern continues. US equity returns were modest compared to the other developed markets, up 2.1% (1% for the US tech sector). Q3 corporate earnings announcements continued to offer a mixed picture. Anticipation around the Fed's speech and Jerome Powell's statement for a potential moderation of rate increases, which could come as soon as December, moved markets upwards towards the last days of the month. In commodities, oil prices ended the month down 9.4%.

## Fund Objective

The main objective of this fund is to maximise potential return for a given level of risk.

## Investment Strategy - Active

To achieve the fund objective the Manager will use investments in collective investment schemes such as unit trusts, OEICs and other UCITS funds and closed ended schemes. Where appropriate the Manager may also invest in individual stocks, bonds, and derivatives ensuring the fund has a diversified portfolio of assets.

Some of these investments will be denominated in foreign currencies which may or may not be hedged back to Pounds Sterling to help reduce currency risk. The proportion of the fund invested in riskier assets such as equities (company shares) is consistent with the funds' Investment Objective.

Generally, 75% of this fund is invested in equities but this figure may change by a maximum of  $\pm 12.5\%$  in the short term depending on variations in the stock markets, or in the longer term to keep the fund within its' risk boundaries.

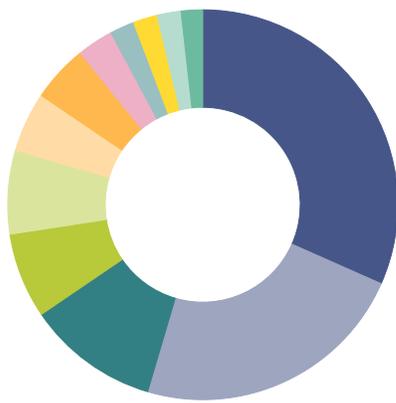

## Who is this fund for?

This fund may be suitable for: An investor who is comfortable with holding a significant proportion of their fund in higher risk investments in order to have the opportunity for a greater investment return. An investor who is prepared to accept investment losses in the short-term in order to achieve potentially greater investment returns over the longer-term. The fund will be subject to fluctuations in value.

## Fund Important Note

Please be aware that adjustments to previously reported data can occur. The value of investments and the income from them can fluctuate and it is possible that investors may not get back the amount invested.

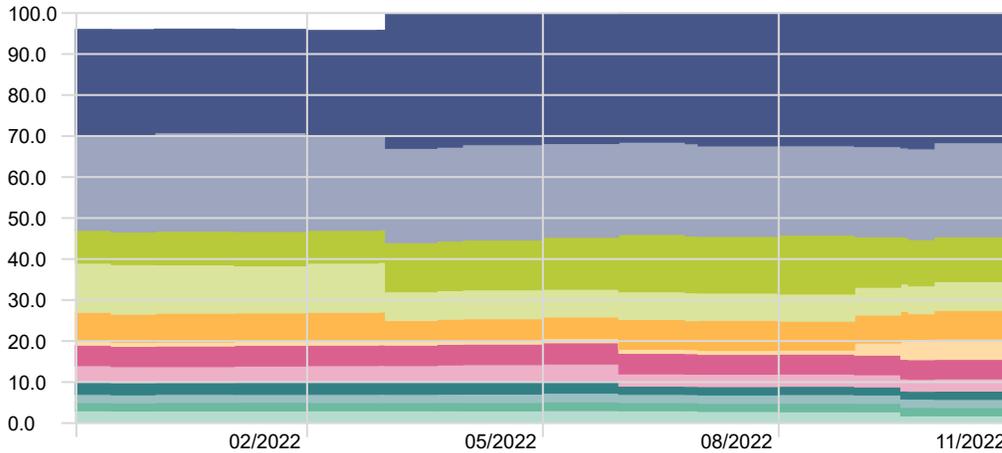

## Fund Allocation

	%
North America Equity	31.6

## Data Definitions

**Inception:** The date at which the fund was first managed. This can be found at the top left corner of the investment growth graph.

**Benchmark:** ARC Private Client Indices – The performance comparator provided in the cumulative return chart and the performance table below. The comparator benchmark(s) shown are representative of the risk/return of the Tatton fund.

**Ongoing Charges to the Funds (OCF)** is made up of the Annual Management Charge and additional expenses. Additional expenses may be deducted from some funds. These may include, third party administration, trustee, registrar, auditor and regulator fees. As the additional expenses relate to the expenses incurred during the fund management process, they will regularly increase and decrease as a percentage of the fund.

**Transaction Cost** is the estimated charge for the fund that may be incurred as a result of the acquisition and disposal of investments. The charge is forward looking and used for pre sale reporting.

**12 Month Yield:** Is the sum of a fund's total trailing 12-month interest and dividend payments divided by the last month's ending share price (NAV) plus any capital gains distributed over the same period.
