## Performance

The table compares the fund performance with the ARC Private Client Indices (PCI) benchmark, a measure of a peer group of similar investment managers using similar asset allocations. The comparator benchmark is an indicator of similar investment strategies and does not show future returns or investor expectations. ARC monthly data is estimated and may vary from actual performance. ARC data is then confirmed at the end of each quarter, which could change monthly returns.

**Past performance is not a guide to future performance**

## Monthly Market Commentary - July 2024

Global equities were flat, in sterling terms, for July. US equities, namely large-cap technology, eroded many of the gains seen amongst other regions. After a set of softer inflationary data, investors are pricing a policy rate cut by the US Federal Reserve in September, supporting the global aggregate bond market, which rose by 1.9%. A volatile market environment for US equities evolved across July, led by large-cap technology, which fell 2.3%. The rotation into smaller companies has been evident, due to fears around the ability for big tech firms to deliver on their heavy artificial intelligence investments.

Japan was the strongest performing developed equity region, returning 4.1% for July. The primary driver was the strengthening of the yen against sterling, alongside the stronger underlying performance of Japanese companies. In the UK the Labour Party's landslide victory has provided political stability and, coupled with recovering economic growth, investor sentiment has improved towards with UK large-cap equities, returning 2.5% for July. Despite a surprise interest rate cut in July, pressure continues to mount for Chinese equities, which fell 3.0%, as weaker manufacturing and consumer data dampens hope of a recovery in the near-term.

The broader commodity index fell 5.1% for July, with weak performance across broader energy and agricultural commodities. Within energy, Brent crude oil fell 6.4%, with investors primarily focusing on a weak technical outlook, ample inventories, and weak demand. Once again, Global Real Estate had a strong month, rising 4.4%, with investors continuing to expect imminent policy rate cuts, supporting these interest-bearing assets.

## Fund Objective

The main objective of this fund is to maximise potential return for a given level of risk.

## Investment Strategy - Cautious

To achieve the fund objective the Manager will use investments in collective investment schemes such as unit trusts, OEICs and other UCITS funds and closed ended schemes. Where appropriate the Manager may also invest in individual stocks, bonds, and derivatives ensuring the fund has a diversified portfolio of assets.

Some of these investments will be denominated in foreign currencies which may or may not be hedged back to Pounds Sterling to help reduce currency risk. The proportion of the fund invested in riskier assets such as equities (company shares) is consistent with the funds' Investment Objective.

Generally, 45% of this fund is invested in equities but this figure may change by a maximum of  $\pm 12.5\%$  in the short term depending on variations in the stock markets, or in the longer term to keep the fund within its' risk boundaries.

## Who is this fund for?

This fund may be suitable for: An investor seeking to maintain capital over the medium to long term. An investor who is prepared to accept a lower investment return than equity markets over the longer term in exchange for trying to minimise potential losses. Someone who accepts that the fund will be subject to fluctuations in value.

## Fund Important Note

Please be aware that adjustments to previously reported data can occur. The value of investments and the income from them can fluctuate and it is possible that investors may not get back the amount invested.

## Data Definitions

**Inception:** The date at which the fund was first managed. This can be found at the top left corner of the investment growth graph.

**Benchmark:** ARC Private Client Indices – The performance comparator provided in the cumulative return chart and the performance table below. The comparator benchmark(s) shown are representative of the risk/return of the Tatton fund.

**Ongoing Charges to the Funds (OCF)** is made up of the Annual Management Charge and additional expenses. Additional expenses may be deducted from some funds. These may include, third party administration, trustee, registrar, auditor and regulator fees. As the additional expenses relate to the expenses incurred during the fund management process, they will regularly increase and decrease as a percentage of the fund.

**Transaction Cost** is the estimated charge for the fund that may be incurred as a result of the acquisition and disposal of investments. The charge is forward looking and used for pre sale reporting.

**12 Month Yield:** Is the sum of a fund's total trailing 12-month interest and dividend payments divided by the last month's ending share price (NAV) plus any capital gains distributed over the same period.
