Performance

The table compares the fund performance with the ARC Private Client Indices (PCI) benchmark, a measure of a peer group of similar investment managers using similar asset allocations. The comparator benchmark is an indicator of similar investment strategies and does not show future returns or investor expectations. ARC monthly data is estimated and may vary from actual performance. ARC data is then confirmed at the end of each quarter, which could change monthly returns.

Past performance is not a guide to future performance

Monthly Market Commentary - December 2024

Global equities experienced a reversal from their exceptional November, falling 0.9% in sterling terms for December. This was aggravated by negative investor sentiment from the Fed's weaker outlook for further interest rate cuts in 2025. This sent bond yields higher, resulting in bond prices falling, with the global aggregate bond market falling by 0.8%.

The hawkish tone from the Fed was softened by US large-cap technology stocks' strong performance compared to broader US equities, returning 2.0%. Elsewhere, Japanese equities returned 1.1%, in sterling terms, on the help of the Bank of Japan's stimulus plans and revised positive economic growth figures. Chinese equities recovered from its November sell-off, rising by 3.6% in sterling terms, as China experienced manufacturing growth and revealed plans to implement more proactive fiscal and monetary policy in 2025.

European equities continued to battle with weaker manufacturing data and political instability, falling by 0.9% in sterling terms. UK equities faced persistent challenges from the Bank of England, falling 1.3%, who decided to hold interest rates. This is despite speculation that a cut was on the horizon, with inflation ticking upwards.

Commodities outperformed both equity and bond markets, with the broader commodity index returning 4.8% in December. This was largely supported by the performance of Brent crude oil, returning 5.4%, driven by expectations of further stimulus measures from China and increased demand amid cold weather in Europe. As for disappointments, Global Real Estate fell 6.0% in December, exacerbated by economic uncertainty and the continued impact of elevated interest rates.

Fund Objective

The main objective of this fund is to maximise potential return for a given level of risk.

Investment Strategy - Active

To achieve the fund objective the Manager will use investments in collective investment schemes such as unit trusts, OEICs and other UCITS funds and closed ended schemes. Where appropriate the Manager may also invest in individual stocks, bonds, and derivatives ensuring the fund has a diversified portfolio of assets.

Some of these investments will be denominated in foreign currencies which may or may not be hedged back to Pounds Sterling to help reduce currency risk. The proportion of the fund invested in riskier assets such as equities (company shares) is consistent with the funds' Investment Objective.

Generally, 75% of this fund is invested in equities but this figure may change by a maximum of $\pm 12.5\%$ in the short term depending on variations in the stock markets, or in the longer term to keep the fund within its' risk boundaries.

Who is this fund for?

This fund may be suitable for: An investor who is comfortable with holding a significant proportion of their fund in higher risk investments in order to have the opportunity for a greater investment return. An investor who is prepared to accept investment losses in the short-term in order to achieve potentially greater investment returns over the longer-term. The fund will be subject to fluctuations in value.

Fund Important Note

Please be aware that adjustments to previously reported data can occur. The value of investments and the income from them can fluctuate and it is possible that investors may not get back the amount invested. All model returns are calculated in £-Sterling and include DFM fee and fund charges, but do not include investment platform and adviser charges. NOTE: All benchmark returns are calculated in £-Sterling and include DFM fees, fund and investment platform charges but do not include adviser charges.

Data Definitions

Inception: The date at which the fund was first managed. This can be found at the top left corner of the investment growth graph.

Benchmark: ARC Private Client Indices – The performance comparator provided in the cumulative return chart and the performance table below. The comparator benchmark(s) shown are representative of the risk/return of the Tatton fund.

Ongoing Charges to the Funds (OCF) is made up of the Annual Management Charge and additional expenses. Additional expenses may be deducted from some funds. These may include, third party administration, trustee, registrar, auditor and regulator fees. As the additional expenses relate to the expenses incurred during the fund management process, they will regularly increase and decrease as a percentage of the fund.

Transaction Cost is the estimated charge for the fund that may be incurred as a result of the acquisition and disposal of investments. The charge is forward looking and used for pre sale reporting.

12 Month Yield: Is the sum of a fund's total trailing 12-month interest and dividend payments divided by the last month's ending share price (NAV) plus any capital gains distributed over the same period.
